RV-1750B  
for 5-7 Cubic  
Yard Box

RV-3500B  
for 8 or more Cubic  
Yard Box

Tendaire Industries Dump Body Vibrators are specifically designed to operate at an optimum level of 2800 vibrations per minute to avoid compaction of light materials. Light materials such as snow, asphalt, and topsoil can have a tendency to compact when higher vibration levels are used. We have found that 2800 vibrations/min. is an optimum level to avoid compaction of these light materials as well as get the job done for coarse material loads. A Tendaire Dump Body Vibrator will provide you with a cleaner dump every time reducing vehicle damage, avoiding material cross-contaminations, and increasing productivity adding to your bottom line.

Tendaire Industries Dump Body Vibrators are available with an 18" or 24" mounting plate. If mounting plate is ordered the Vibrator will ship bolted to the plate.

As an added benefit if you are replacing a cougar DC-3200 Dump Body Vibrator let us know. Tendaire Industries can adjust the mounting to accommodate fitting an existing cougar mounting plate saving you time and money.
